Physical Security

Objectives:

At the end of this episode, I will be able to:

1. Identify data physical security concepts.

Exam Objective: *3.1 - Summarize physical security concepts.*

Description: In this episode, the viewer will identify various techniques to implement physical security such as bollards, fencing, security guards, security cameras, locks and environmental controls like fire suppression and heating, ventilation and cooling (HVAC) systems.

- Physical access controls
  - Outside
    - Bollards, fencing, lighting, signs
    - Architecctural reinforcement
    - Security Cameras
    - Reflective glass, datacenter camouflage
  - Lobby
    - Security guard
    - Security cameras
    - Access control roster
  - Secure access vestibule
    - Known as a mantrap
    - Demarc between public access and secure access
    - Locks
      - Card reader
      - Smartcard authentication (RFID, key fob as well)
      - Biometrics
      - PIN
  - Office
    - Locks
    - Cameras
    - Lighting
    - Fire, water, carbon monoxide detectors/sensors
    - Safe
  - Datacenter/server closet
    - Locks
    - Cameras
    - Lighting
    - Power redundancy
    - Environmental controls
      - HVAC
      - Fire suppression
      - Monitoring and sensors
