Cloud Technologies

Objectives:

At the end of this episode, I will be able to:

1. Identify cloud technologies and components.

Exam Objective: *2.5 - Summarize the purpose and operation of virtualization.*

Description: In this episode, the viewer will identify the characteristics of the cloud. The viewer will also identify cloud service models as well as the cloud deployment models.

- Demonstrate and discuss key cloud characteristics.
  - Log into the Azure Tenant
    - On-demand self-service
  - Log into Azure Mobile App
    - Broad network access (Laptop, smartphone,tablet)
  - Create a Storage Account (Resource Group, vNET)
    - Resource pooling
  - Create an Availability Set
    - Rapid elasticity
  - Show Cost Management
    - Measured service

- Compare and contrast cloud service models.
  - View vNET
    - Infrastructure as a Service (IaaS)
  - TSearch for App Services and create/view offerings
    - Platform as a Service (PaaS)
  - Search for SaaS offerings in Azure
    - Software as a Service (SaaS)

- Compare and contrast deployment models
  - Public cloud
  - Private cloud
    - Virtual Private Cloud
  - Hybrid cloud
  - Community cloud

External Resources:

During this episode, you can reference the following external resources for supplementary tools and information:

- NIST SP 800-145 - https://nvlpubs.nist.gov/nistpubs/Legacy/SP/nistspecialpublication800-145.pdf
- Microsoft Azure, definition of PaaS: https://azure.microsoft.com/en-us/overview/what-is-paas/
