Documentation Management

Objectives:

At the end of this episode, I will be able to:

1. Identify key components of documentation management.

Exam Objective: *2.7 - Explain the importance of asset management and documentation.*

Description: In this episode, the viewer will identify the components used in documentation management such as service manuals, various diagrams, change management, workflow, and server configurations as well as secure storage.

- Documentation management
  - Architecture and infrastruture diagrams (Lucid)
    - Network
    - Cloud
    - Physical
  - Asset Management
  - Workflow diagrams (onboarding and DR)
  - Configuration and change management
    - CMDBS
  - Service manuals (Oracle SPARC T8-1 manual)
  - Patch Management
  - Server configurations and baselines
  - SLAs and uptime requirements
  - BIA and DRP (BIA template and NIST Plan Maintenance)

External Resources:

During this episode, you can reference the following external resources for supplementary tools and information:

- Service Manual for Oracle SPARC T8-1: https://docs.oracle.com/cd/E79179_01/html/E80510/index.html
- BIA example: https://csrc.nist.gov/CSRC/media/Publications/sp/800-34/rev-1/final/documents/sp800-34-rev1_bia_template.docx
- NIST SP800-34 (Continuity Planning for Federal Information Systems) https://nvlpubs.nist.gov/nistpubs/Legacy/SP/nistspecialpublication800-34r1.pdf (mentions plan maintenance)
