Data Security Risks

Objectives:

At the end of this episode, I will be able to:

1. Identify data security risks.

Exam Objective: *3.4 - Explain data security risks and mitigation strategies.*

Description: In this episode, the viewer will identify various data security risks such as hardware failure, malware, data corruption theft, social engineering and data breaches.

- Component failure
  - Storage device
    - Implement RAID solutions
    - Backup strategies
    - Is cloud storage a solution?
  - RAID controller
    - Consider duplexing
    - Is cloud storage a solution?
  - Power supply/circuit
    - Redundant power distribution techniques
  - Data corruption
    - Integrity scanning
    - Checksums
    - Storage protection (bit rot for archival data)
    - Backups
  - Common theme: Component redundancy and backups
- Theft
  - Storage devices
    - Drive encryption
    - Drive locks (think physical security)
    - Server locks
  - Laptops and mobile devices
  - Malware
  - Insider threats and backdoors
  - Social engineering
- Breaches
  - Identification & disclosure
  - Unwanted duplication and/or publication
