Items/Lot Specification

Items Without Lots :

Item: RACK MOUNT SERVERS (Along with all allied accessories and installation)

UNSPSC: Computer server

Specifications / Requirementsss:

Server Specifications: Processor • 2 x Intel® Xeon® Gold 65xxY+ Processor • 60 MB Cache • Cores: 32 • Total Cores: 64 • Clock Speed: 2.1GHz – 3.1GHz • TDP: 250W • Intel® latest chipset Memory (RAM) • Installed Memory: 1TB DDR5 ECC with dual rank supported or higher. • Scalability: Each server must have the capacity to be scalable up to 2 TB or more through additional DIMMs, without requiring any additional memory expansion hardware. • Error-Correcting Code (ECC): Enabled for reliability. Primary Storage • Operating System Drives: o 2 x 256 GB NVMe SSDs for OS installation. N.2 • Data Storage Drives: o 6 x 1TB SAS, hot-swappable. Storage Scalability • Builtin Additional storage bays available for future expansion. RAID Configuration • Integrated RAID controller with support for: o RAID Levels: 1, 5, 6, 10. o Online RAID expansion capability. Network Interfaces • 2 × 25Gbps SFP28 ports, backward compatible with 10Gbps, including compatible SFP28 transceivers. • 4 x 10 Gbps Ethernet Ports. Auto negotiable to 1 Gbps • 1 x 1Gbps Management/ILO Port. HBA Cards • 2 HBA NVMe Ready cards with dual ports of 32Gbps or higher data transmission speed. Auto negotiate to 16 Gbps. Chassis • Rack-mounted 2U or 3U server with redundant hot-swappable power supplies and fans Operating System Support • Support for all operating systems from Microsoft (X86), Linux, Ubuntu, Solaris Intel, RHEL, SUSE, VMware/Citrix/Oracle/Open, Hypervisors. Install Media • Non-licensed Bootable media/ISO Files for latest version Windows and of ESXI with embedded drivers for server Hardware including, HBA, Network and Raid Post-Sales Support and warranty • The supplier shall provide comprehensive post-sales support for the entire solution (hardware, software, and licenses) and associated equipment for a period of five (05) years, with 24x7 extendable support. The Original Equipment Manufacturer (OEM) must provide a written commitment to support and services. Dedicated support engineers from the supplier are mandatory, Critical components must be available on-site. • OEM Must supply the required Servers through its Highest level of Partners in Pakistan. • The OEM must be in business since last (Ten)10 years for manufacturing, supply & installation of Enterprise grade Rack Mount Servers. • The manufacturer must have country wide direct support from its Partners including major cities of Pakistan i.e. Islamabad, Lahore and Karachi. • Bidder must provide evidence from manufacturer to have spare parts in Pakistan with Next business day (NBD) delivery commitment in Islamabad (Documentary evidence required). • Firmware/software/patches upgrades of equipment must be done proactively during the warranty coverage period. This should be done when stable release of major/minor firmware /software/patches are available. This should also be analyzed at least once a year. • All equipment should be quoted with 5 years onsite comprehensive warranty including parts and labor / support. No

additional charges would be paid on account of parts replacement or labor charges during warranty period of 5 years. • The installation & configuration should be carried out by certified engineers from the supplier. • The proposed server OEM shall be positioned in the latest published Gartner Magic Quadrant for the relevant technology category. Documentary evidence shall be provided by the bidder. • All network ports must be fully populated with the required transceivers (SFP/SFP+/SFP28) or RJ-45 connectors, except for the ports specified as "without SFP's". The supplier/bidder must provide all necessary converters, cables, and transceivers for the populated ports.
